certilytics

CORE® Quality Measures

Measure care quality to support risk stratification and provider performance.

▶ Our Approach

The quality of care a patient receives, and a provider delivers, are essential to improving clinical and financial outcomes across the healthcare ecosystem. At Certilytics, we are committed to helping leading healthcare organizations provide safe and high standards of care.

Use our extensive list of 80+ quality measures to evaluate clinical quality with NCQA Certified HEDIS measurement, plus create custom measures by program or population.

HEDIS

NCQA Certified HEDIS certifications on 80+ measures

- **Statin Therapy**
- **Hospitalization Follow Up**
- **Asthma Med Ratio**
- **Cancer Screening**
- **Well-child Visits**
- **HbA1C Testing**
- **...80+ Total**

Non-HEDIS

50+ CQM measures based on peer-reviewed national standards

- **Adherence Beta Blocker**
- **Hepatitis C Treatment**
- **Post-Surgical Infection**
- **Antiretroviral Adherence**
- **IBD Steroid Use**
- **...50+ Total**

Client Specific

Ability to replicate or develop client specific measures tied to specific programs or outcomes of interest

- **Create custom measures for specific clients/populations**

- **Replicate existing measures tied to specific clinical programs/targets**

About Us

An AI-driven Predictive Analytics Solution
Built for Healthcare

For 10 years Certilytics has been delivering enriched healthcare data assets and predictive analytics to large healthcare organizations. These powerful analytic assets are helping leaders lower costs and improve outcomes.

Customer's trust us with their data and are confident in the predictive insight we provide.
